Montenegrin decision. The powers refused and insisted on the immediate pontion of the convention; While execution were pending, England anticiing the refusal of the Porte, took the native in effecting an understanding between the powers and made verbal proals to five other Cabinets for sending to urkish waters vessels from each power, arrying troops for the land service. Austria accepted, but objected to sending troops for disembarkation, and demanded that the fleet only consist of two or three vessels from each power. Russia alhered to proposals without reservation. Other powers made reservation of points of deal, but on the whole complete underanding was established on the expediency fuval demonstration. Negotiations on the Montenegrin question are perfectly distinct rom those in regard to the Turco-Greek frontier. The latter negotiations will nter a more active phase when the Porte has replied to the collective note. If the reply is negative it is considered probable that the naval demonstration will aim at the settlement of the Greek as well as the Montenegrin question.

The Ambassadors at Constantinople are making great efforts to induce the Porte to immediately accede to the demands of the powers, but the Porte is little disposed to comply. The Porte has made confidential overatures to several powers, more particularly Russia, England and Germany, the object being to prevent accord among the owers, and although this policy has not ad the desired result, it is feared that the Porte still cherishes a hope of succeeding and thus continues in an unheeding

An interview between the masters and peratives of Bolton and that dis rict yesterday, resulted in the operatives laring their intention to strike on Wedesday next unless an advance of five per ent in their wages is conceded. The masters said they would in such event more the general lockout. The dispute rectly affects 4,000,000 spindles and 10,of on a strike at Rochdale. A strike is also probable at Oldham.

#### JOINT DISCUSSION.

There will be joint discussions by Gov JARVIS and Judge BUXTON, the Demo cratic and Republican candidates for Governor at the following places:

Jacksonville, Onslow County, August

Trenton, Jones County, August 5th Kinston, Lenoir County, August 7th.

THE GREENSBORO North State is exercising its inventive faculties with more than ordinary industry. We had occasion a few days ago to call its attention to the conspicuously inexact statement made by it in regard to Judge Fowle's speeches in 1876, and by way of correction, we suppose, it says that "THE RALEIGH NEWS boastingly says that General Cox was never defeated before the people. Our neighbor forgets that General Cox, when running as the so-called Liberal Republican candidate for Lieutenant-Governor of North Carolina in 1868, received only about ninety votes in the whole State out of near two hundred thousand which were cast in that election. Most people would call this a defeat." THE NEWS has made no such statement, boastingly or otherwise, in regard to General Cox. On the contrary THE NEWS, in sketching his history, stated when, where and by whom he was defeated in 1872. In 1868, General Cox was not a candidate for Lieutenant-Governor and was not beaten. He was a candidate for Solicitor of this Radical district, and was elected.

THE RAILROAD earnings for 1879, as reported in Poor's Manual just issued, were \$529,012,999, against \$490,103,351 in 1878. With this increase in earnings, there has been a steady decrease in freight rates. At the rates charged seven years ago the earnings for 1879 would have been double what they were. The gross earn ings were thus distributed among the several sections of the country: New England States, \$41,329,825; Middle States, \$170, 310,846; Southern States, \$43,917,284 Western States, \$232,379,646; Pacific coast States, \$10,721,157. The aggregate amount paid in dividends compares as follows: New England, \$7,256,205; Middle, \$24,335,164; Southern, \$2,131,770; Western, \$23,561,262; Pacific coast,

THE SCHEME to have the New York Legislature called together for the purpose of providing that electors shall be chosen by Congressional districts, which was much discussed at one time, seems to be in process of revival. A New York dispatch to a Cincinnati paper states somewhat positively that the Legislature will be called together immediately after the October election for this purpose, and that by the change the Republicans expect to secure at least one-half the electors in New York. There is no law to prevent this, but it would be an outrage only equaled by the electoral frauds of 1876.

SOUTHERN OUTRAGES have begun. The Tribune has one case of a revenue officer ordered to leave Texas because he made a speech at a Republican meeting; and another of "a customs inspector in Texas," who, having casually mentioned the fact that he was a Republican, "has been warned by the Democratic leaders of his locality that a repetition of the offence will cause him to "forget to wake up some morning." When these items get back here, those who furnish them to the Tribune laugh loudly, as the Tribune editor does in his sleeve. But the ignorant Northern people believe them all.

A WHOLE PARTY OF OLIVER TWISTS it is; the Radical party, that is to say. Not satisfied with \$25,000 cash down, Col. Young has been in Washington letting it be known what great things could be done here with "substantial aid," and got it, we suppose. And not satisfied with that, the new Secretary calls for more "substantial aid," and, "to the fullest extent." Read his telegram to the New York Times.

THE OHIO DEMOCRATS have at last learned that the Ohio "idea" won't pay even in Ohio. Their Convention on Thursday dropped that craze and endorsed the day dropped that there is but little doubt that population as 31,299. In 1870 it was 24, day dropped that there is but little doubt that THE OHIO DEMOCRATS have at last

#### WHAT IT COSTS.

No man who has lived the last twelve years in North Carolina will pretend to say that the peace and quiet and security to both person and property, in a word, the good order and good government that we now enjoy, existed during the dark days of 1868, 1869, 1870. Then neither life, liberty nor property was safe. Taken altogether, the times then were about as bad as times could be. They have not yet faded from memory, and it is needless, therefore, to compare Radical rule with Democratic rule to see which best fulfils the end of government, that is to say the preservation of the peace and quiet and security of the community. But a great campaign is beginning, and experience has taught us that Democratic successes are to be won by Democratic labors, by fair, honest arguments, by hard work, by thorough organization and healthy discipline. These labors mainly fall upon our friends in the several counties and districts; ours the task of furnishing them and the people with the facts upon which our claims to success are founded, and upon which we must rely for success.

From time to time for four years past we have made it our business to inform the people of what has become of their money, and now at the outset of the canvass it seems a proper time to collect together the facts, that the people may know how much taxes they have paid in each year since 1868, and what has been done with them in each year. The tables annexed furnish the information, and any one may verify the figures in the tables by reference to the books of the Public Treasurer. People who may have been misled by talk of Democratic extravagance have only to look at the figures for 1869 and 1870, when Radicalism ruled in North Carolina, and compare them with any of the other years when the power to levy taxes and to expend money had passed into Democratic hands, or with these last four years when the whole administration has been Democratic. The Democratic party, they will see, has not only furnished a vastly better government, but the figures show that it has supplied a vastly cheaper government

than the Radical party did. If the people wish once more the worst government the world ever saw, and at the highest price, let them elect the them vote for the Democratic candidates. The Radicals collected and paid out millions in money and many more millions in bonds, and there is nothing to show for either money or bonds. The Democrats have collected little, have issued no bonds, have paid for everything, and return a good account of stock in the shape of permanent improvements. No party has ever had a better showing to make to the people than the Democratic

NEW YORK CORRESPONDENCE.

[Correspondence of THE RALEIGH NEWS.] NEW YORK, July 23, 1880. Wilson, of the Western North

Carolina Railroad, and Col. S. McD. Tate, of Morganton, are here for a day or two. It is not often that I have had so high compliment paid to me as that by a little sick child this week. You know, if your readers do not, that the excellent house at which I board is kept by two elderly maiden ladies, and that it is so generally filled by old and infirm people, mostly la-dies, that it has sometimes been called an "asylum" for such classes. Well, a geneman who had gone to the country for the summer came back to town and to this house with his wife and child and nurse, for a change of air and medical advice for the child. It was teething, and fretful and feeble. Holding out my hands to it it came to me at once from its father's arms, and laid its head upon my shoulder, though it had never before seen me. Any father, or grandfather, who has been long deprived of the companionship of little innocents, will underst nd how I felt. And it seems not to have I en a spasmodic notion of the child, for meeting the nurse with it in the hall a day or two later, it again came to me, and on leav-ing kissed it's little hand to me, which was, the nurse said, a 'etter ind'cation of vitality than it had given that day. Do any of your readers smile at my recording so trivial a matter? Let them, as Charles Reade would say, "Put themselves in my place." An exile from home, with seldom sight of a child except in the streets. this is one of the things, trifles, if you please, that go to make up life, and happy

s it when such trifles can be entered upon

the right side in the book of life. Do you

remember that when you and I were board-

ing with these same ladies, thirteen years

ago, the crying of a child was pronounced

by a gentleman whose family was at home

in North Carolina as the sweetest sound he

had heard since he had been in the house?

The house was noted for en absence of

children, and he was thinking of his own

little ones at home, whose practle, and even

their crying, would have cheered him in his exile. On Sunday afternoon, on my way church, finding that I had anticipated the hour of service, I took a seat for a half hour in Union Square, which was then thronged with all sorts of people, enjoyng the bright balmy sun and air. "Have you seen Dr. Tanner?" asked an old man near me. I had not. "I go to see him every Sunday," said he. "I admire him, and he will do what he promises. I live on twenty cents a day, never drink a drop of spirits or beer. I haven't worn an overcoat in sixteen years, and I never wear drawers. See here," he said, as he drew up the leg of his pants, to Radical State ticket. If they want the show a muscular bare leg, "I am best government for the least money, let seventy-six years old. Twenty odd years ago I was dying of dyspepsia—had three doctors attending me. Told my wife to call in them doctors, pay 'em off, a 1 tell 'em that when I wanted them I would send for them. Wife cried, but she knew | beauty. I was in earnest. Cured myself with mullen root, (&c., &c., the other ingredients I have forgotten.) Weighed 113 pounds, now ate vicinity. It bids fair to realize a bale weigh 170. My wife died twenty years to the acre, which is extraordinary for this ago," and so on. The sweet chimes of Grace Church starting at this moment, lice are playing havoc with some of the I left my friend to continue his personal history to a little audience which had been attracted by his elevated voice and earnest gesticulations. It takes all sorts

of people to make a world. Among the many applications to publish books, one has come to me from Canada of different character from the generality. which are mostly novels. It is a vision of history from 1880 to 1930, vouchsa'ed to a native of Virginia, residing in Canada, at the completion of the 50th year of his labors as a minister of the gospel. He sets out by stating the universal corruption of political parties and public officers; then whilst in a sort of trance reads in history as published in 1930, that the Republican candidate for President was elected this year, 1880; that he subsequently becomes Emperor; that the South resists his rule and another four years' bloody war results; that the South being worsted, appeals to England to send one of the Royal Dukes over here as King; that under him the kingdon of Virginland, with capital at Richmond, is established and flourishes; the empire continuing though shorn of the Southern States; and the kingdom of Canada established on its Northern border. For several reasons the proposal to print was declined. One reason is, that the author, who avows himself to be a Repub'ican, predicts the election of Garfield, and another war between North and South. History does not always repeat itself, and it is not going to repeat any such follies as these.

I have lately seen a copy of a monthly publication, by Jed. Hotchkiss, Staunton, Va., entitled "The Virginias; a Mining, Industrial, and Scientific Journal: Devoted to the development of Virginia and West Virginia." It contains a vast mass of infor mation, which cannot fail to attract to those States some of the capital and enterprise of which the South stands so much in need and which abound in other sections. I suppose that the publications o your Agricultural Department are performing the same service for North Carolina. but have not seen one of them for many months. Besides the frequent incidental mention of the mineral wealth of North Carolina as well as of the Virginias, the paper has an interesting Report of Professor Kerr to Governor Jarvis, which I had not before seen, giving an account of a visit to that great mineral centre, Pittsburg, Penn., from which his statements may lead to important results in Western North Carolina. What is needed is, to open the eyes of the outside world to the vast mineral wealth of that section. The increased pleasure travel in that direction will do much to supply that need, and the labors of the State agent in England will

A call has been issued for a meeting Representatives in Virginia on the 31st inst. to try to arrange a compromise between the regulars and readjusters so that but one electoral ticket will be voted for in November. NEWS EDITORIAL CORRESPONDENCE. NARRON'S STORE, July 24, 1880. Early in the morning, before we reached Selma, it was evident that we should have a showery day. We reached this place about 11 o'clock a. m., in company with several gentlemen from Selma, an

found a very good crowd.

GENERAL COX delivered a plain, earnest, practical speech in which he treated questions and sub jects pertaining to our national and State politics. He dwelt particularly on the candidates of both parties, and paid his respects to his competitor, but refrained from any extended remarks on Mr. Bledsoe, as he was not present. The General made a fine impression on this people, who are a plain, honest, unsophisticated folk and who are infinitely better pleased and entertained by the truth plainly told than by all the rhetoric and oratory that could be displayed, and the General seemed fully to comprehend this phase of their char-

At the conclusion of General Cox speech the crowd called for

MR. H. L. WATSON. of Selma, who spoke for a half hour, di recting his remarks particularly to county matters. He contrasted, with good effect the condition of the county under Radi cal rule with its present. Under Cool and other carpet-bag plunderers the county bonds were floating around almost worthless, and now the county is out of debt with \$9,000 in the Treasury. Mr. Watson made some strong points, and his speech was well received.

It is the general opinion that Genera Cox will carry this county by a larger majority than has been won by any Democrat since the war. He is immensely popular with this whole people, as they assert will be shown by the large vote that will be cast for him in November.

FINE CROP PROSPECTS. Along the whole line of road from Selma to this point—fifteen miles—the crop are fine. Old farmers tell me that the cotton crop is better than they have ever known it at this date. The upland corn, which suffered most from drought, is generally small, but the recent abundant rains give promise of a large crop.

The farmers are in fine spirits; good rains will give a fruitful harvest, and a good ticket gives hope of restoration to the blessings of a properly administered government, and they appear buoyant, hopeful and happy.

DUPLIN POLITICS AND CROPS:-

Magnolia, N. C., July 24.—We have had several refreshing showers of rain right recently. A fierce thunder storm visited this region Wednesday evening. The lightning struck Capt. J. M. Hartsell's steam engine in his pump manufaclong while the ground is thoroughly wet and the splendid crops of this section almost surpass themselves in growth and

Mr. L. D. Farrior, of this village, has the finest patch of cotton in this immedisection of country. We are informed that cotton fields.

Watermelons and apples are brought to this market in immense quantities.

One day last week our old friend J. D. Wilson, Esq., had with him sixteen grand-

children, and expressed his regrets that the other seven couldn't be there. The enthusiastic boys of Magnolia raised a flag-pole 55 feet high yesterday evening, and in a very few days will spread to the breeze a Hancock, Jarvis and Shackelford banner. It is all the work of boys under eighteen years of age. They propose organizing a club. It displays a laudable ambition and patriotic spirit in our youngsters, and ere many years glide away old Duplin will no doubt have occasion to be proud of these Democratic juveniles. The voters, evidently inspired by the enthusiasm of the little men, propose organizing their club the latter part of next week. It is bad they let their minors beat them.

Your correspondent asked a Republican yesterday who would get his vote in the coming Presidential contest, and with a dignified air he responded, "General Win-

PAMLICO NEWS:-

Stonewall, July 23d .- After a long dry season the spell was lifted last Sunday and it has been rain, rain, continuous rain every day since. Too wet to plow, which prevents the farmers from finishing up their crops which most all would have done this week if it was not too wet.

Crops are magnificent. Send all who anticipate emigrating from N. C., to see our crops and I am satisfied that they will never go West or South.

The health of our county is excellent Our County Democratic Convention meets at Bayboro on August 2nd, for the purpose of nominating our county ticket.
The Congressional Convention for this
district, also the Senatorial, meets in Plymouth on August 12th. Maj. Latham seems to have the inside track for Congress. He will undoubtedly receive the nomination without opposition. The convention for a joint nominee to represent this county and Beaufort will assemble in Washington on August 14th. The political index points to no particular man. Also Beaufort county nominating convention for county ticket comes off at the same time and place.

DRUNK IN THE STREET.

TRANSLATED FROM THE FRENCH. What's the next case?" said the po-

ice commissioner. "Monsieur le commissaire," replied the policeman, pushing an old man up to the dirty bar that separated the magistrate from offenders, "last night on our rounds we fell in with this man lying on a bench on the Boulevard. He was fast asleepdead drunk. He said he had nowhere to

"What's your name?" said the magistrate to the old man.

"Dumont, monsieur le commissaire Joseph Bernard Dumont."

"Your age?"

The magistrate's secretary, a personage as dirty as the office, wearing a goatee and moustachies cut like a brush, wrote down this information on a sheet of office paper, ruled with various lines.

"I was born on the 14th of June, 1800, the day of the great battle of Marengo. monsieur le commissaire, so that I am just a little over seventy-eight. My wife was a little younger than I am. She would have been seventy-five next December. Well, I'm glad she's not here. She died day before yesterday, monsieur le commis-

"Where were you born?" "We were both born in the same place monsieur le commissaire, both born a Moiran, a little village in the department of the Jura. We left there soon after our marriage. It was a fine spring morning when we left for Paris. We hadn't much money, but we had each other, and we saw the world through colored spectacles. We saw things as they were, too. We were right. For by hard work, and saving, and enterprise, and helping each other, monsieur le commissaire, for I was everything to her and she was just the same to me, we managed to get nearly a million of

francs together." "What do you do for a livelihood?" "We got nearly a million of francs together, monsieur le commissaire. I am oseph Bernard Dumont, of the old established house of Dumont & Co., patronized by his Imperial Majesty Napoleon III. by his Majesty Alexander VI., emperor of all the Russias, by her Most Gracious Majesty Queen Victoria, by their Majesties Leopold, Oscar, Isabella, etc., etc. Carpets, hangings, art furniture. I stuffed and fitted up with my own hands, every royal and imperial railway carriage in al Europe, Africa, and America. Ah! the good Lord is not to be blamed for what has happened to us. We were not half grateful enough for all his mercies. You see we never thought about him as we ought; and after he had given us prosperity he sent us a son to the end that we should recollect that after Pharaoh's fat cows came the lean kine. Ah, monsieur le commissaire, if you had only known my boy you must have admired him! He is nd-hearted as he is handsome. When

The policeman took the old man by the arm, and made him sit down beside him on the yellowish, dirty, painted bench which ran round the room.

The old man did not seem to notice that no one was listening to him. With his back against the wall, shaking his head. and stretching out his legs before him, he went on to himself, looking at some point on the floor, to which he addressed his speech in the most piteous and earnest

"When he was a baby, as I was saying, there never was such a pretty child. He was fair, with a little curly head, and great blue eyes sparkling with intelligence and roguery, a complexion like a young lady's-nobody could see him without admiring him. Everybody loved him, he was such a cunning little monkey. The brothers noticed him in the Place Royale, where his mother-my poor old woman—used to take him to play, and where they (you know them?—the brothers in the Rue des Francs Bourgeois) used to come every day themselves to walk with their scholars. Well, they saw him. and they wanted him. We were just beginning to get on then, it was before we got rich, and we accepted their kind offer. They didn't charge us anything for his edacation; indeed, they furnished him with everything gratis, pens, paper, books, etc., and they sent us custom. At that time we confined ourselves to seats-chairs armchairs, sofas, and so on-and, one must never forget a kindness, the brothers helped us on. But at the same time Henry was a great gain to them. He took all their prizes; he took everything! Was there an examination, one was sure to find Henry Dumont, son of Joseph Bernard Dumont, competing successfully. Ah, monsieur, how proud we were of him when he got another crown! How happy we were when we thought about him. We could hardly read and write well enough to make out our own bills, but we had a son who, when he was only twelve, knew ten times more than we did. There was not a day passed that he did not make us feel that in history, or geography, or arithmetic, arithmetic especially, we were fools to him. Ah! it is a splendid thing to have an education!

"When I said he made us feel we were but fools to him, that is only my way of putting it, for the dear fellow never wanted to make us feel ashamed beside him. But we just knew we were not his equal. He never told us so. He was so kind, so considerate, so thoughtful! Ah, monsieur le commissaire, all went on right until he married!

rather we had added to it all kinds of superior furniture. We never worked in anything of an inferior kind. We always dealt in the dearest and the very best. Nobody bought of us but very rich, great people. We were all the fashion for those who could afford to pay. It was chic to have a piece of furniture from Dumont's. Ah, me! how we made money in those days! It is a splendid government, mon-sieur le commissaire, under which you Then nodding, as if he had received an

time to have attended to anything out of my own business, or may be could I have read a little better than I did, I might have been put upon the list of arbitrators in the Tribunal de Commerce. Everything, you see, came to us through our son, for the good brothers gave us our first start, and our son Henry brought us under their notice. So could we, when he wanted to be married, refuse to let him have the wife he set his heart

had he made his choice among people like ourselves-had he married some workingman's daughter, whose father had grown rich, of course, but who had still something about him to remind one that he had prospered by the work of his own hands. But we always had let him do just what he pleased, because we were so proud of him, and with his education it could not be expected he should think as we did. He married a musical lady, monsieur, what they call a pianiste, and I never could make out what attracted him. She wasn't very pretty, though she was rather good-looking. They said she had a great talent for music; may be that took with him. We, of course, knew nothing about music, and later on, after their marriage, when she thumped upon her piano in her drawing-room, and everybody cried 'Bravo!' and went into ecstasies, as we sat in a corner listening with all our ears, we could not make head or tail of it. But we were pleased, all the same, because h seemed so happy and so proud of her.

"Ah, yes! she is the cause of all our

troubles, monsieur le commissaire. We had given our son when he was married half of what we owned-that was liberal, was it not? She had nothing. It is not right, some people say, that parents should rob themselves for their children. And there's a proverb that says, too, 'La femme fait le ménage ou le défait.' Our money seemed to go at one gulp. Our son's wife could not stoop to vulgar things. She held herself above them. She called herself an artist! My son told us she had wings-that she was a lark, a scraphim, and what not?—hovering above our workday world. He said that cares of housekeeping were to her like the thread to which naughty boys tie cockchafers-a dreadful chain which tortured her, and maimed, and killed her. It is a terrible thing, I think, to be a superior woman, and she ought to have been better watched over by her family, for in six months people were all talking about my son's wife. They were saying—though he never saw anything but what was right-that she had too many admirers.

"Poor mother! She and I were not superior, and we grew angry. We couldn't tell him all that people said at first, and indeed he would not have believed us if we had. We were trying hard all this time to stop the leak made in the resources of our house by what I had given the young couple. We wanted them at first to leave that money in our business—to row in the same boat with us. The business was excellent, it would have made good returns. We knew so well how to manage it. But they would not. They were devoted to art. They had a country residence, an appartement on the Boulevard Haussmann, handsome liveries; they gave splendid dinners, madame had her admirers as I told you, and at last one

"Ah! monsieur le commissaire, I don't know if you have children, but if you have, put them into the police, do anything with them rather than try to get them a government employment, for then somehow when they get it they seem of more importance than their parents. Yet may be I am wrong, only don't marry them to pianistes—don't let them learn to

play the p'ano. "One morning my son came. Seeing how things were going—I mean what people said about his wife—we did not go there often. I had tried to give him some advice. I had gone so far as to tell him that I was afraid his wife was a little extravagant, and even that I thought he ought to look after her more. He did not like my interference. He repeated my observations to his wife, who, ever after that, looked black at her husband's parents, so that the truth was we had not seen her for six months, and hardly him. It was a great sorrow to my old woman and me. We used to go at night, after dark, and walk about the Boulevard near their house and try to see him. It was all the pleasure we had left excepting to work hard, for we thought he might want some day what we could put away for him.

"Well, as I told you, one morning he came to our house. He was pale as

"Oh, heaven! we thought, he has found out something about his wife, poor fellow! "And we both began to cry before he

had said a word. "Never mind, my boy,' I said at last, almost choked as I spoke. 'Has she

eloped?—is she gone?" "'Gone? Who? My wife? No indeed, father, she is equal to the emergency. She will stay by me. Her devotion to me is as great as her love. She is see-

ing all who call-I dare not. She is my comforter. She does not shrink from the poverty before us. She told me so. She will give music lessons in secret. She will work for me until I find means to work for her. We shall succeed in getting on our feet again, we know we shall; but just for the present it is dreadful. She and I are the victims of a whole train of circumstances.

"Well, the long and the short of it was that they were utterly ruined. They had spent their last cent, and owed enormous sums. Their furniture was seized and so on, but our dear boy would have it that their misfortunes were all his fault. He justified his wife, nay more, he glorified, he exalted her.

"What could we do? What would you have done yourself, monsieur le commis-

SIXTEEN PAIR OF TWINS.-Iredell county is doubling its population faster than any county in the State, and Davidson township laughs at all the other townships in Iredell. Its population has increased in the last decade from 1,540 to 2,294. One way in which this increase can be accounted for is on the ground of twins. There are 16 pairs of these interesting specimens, says a correspondent, that have been confessed to, and there are many other suspicious looking youngsters. Tourgee can now find other prolific sources for our increase in population than an accusation that our enumerators are counting in all the names on tombstones. It may be added that the men and women of Davidson township are as thrifty and industrious as any people that have ever been lied about.

WATER-WORKS .- We are glad to be able to say that some of the gentlemen in town have begun to move in this direction. Yesterday while passing the corner of Jones and Wilmington streets we noticed a dam, well constructed, and already more than half full of water. While we congratulate the builder on his enterprise in endeavoring to supply a long felt want, we are sorry to add that certain sounds in the neighborhood indicated that he had been recalled by the home government and spanked for carrying the materials, consisting chiefly of sand, in his hat.

THE DEEMS FUND.—It will be remembered that Rev. Dr. Charles F. Deems, last fall, devoted a sum of money to the University of North Carolina, to be loaned needy students to enable them to finish their education. On his return from Europe and Asia he sent \$200 more. It is his grateful acknowledgment of the Divine Providence which has brought him safely home. It is exceedingly pleasant to see our distinguished friend who so long resided among us, thus remembering the institution in which he was once a professor, and helping the poor young men of the State.

THE NORTH CAROLINA INDUSTRIAL Association.—The committee appointed by this body will call on the citizens of Raleigh to-morrow for donations of money and such other aid as they may desire to give to the colored fair.

We hope that they will meet with liberal response. The object could hardly be better: for the surest way to make the colored man a useful citizen is to aid his efforts to raise his own self-respect. The colored fair is such an effort and deserves every encouragement. The committee consists of John O'Kelly, B. J. Edwards, Jr., Norfleet Jeffreys, Wash. Hayes.

THE REVOLVING ANNIHILATOR .-Some enterprising yankee has patented an invention which bids fair to make an immense change in the equipment of armies. It is doubtless well known, especially to those who have always been engaged in peaceful pursuits, that recent improvements in fire-arms, and the introduction of breech-loading and repeating rifles, have necessitated a vast increase in the quantity of ammunition carried with an army, and that the transportation of this ammunition is one of the most difficult problems of the art of war.

The invention alluded to, known as Tappertit's Patent Revolving Annihilator and Military Economizer," saves this expense by utilizing the projectiles of the enemy. The idea is simplicity itself. A number of tubes are secured in openings in a horizontal shaft, and at different angles, so that the end view of the whole arrangement shall present the appearance of the spokes of a wheel, the shaft being the hub. The shaft is caused to revolve by nigger-power, or any other convenient means. When a battle opens these machines are placed in line, the shafts horizontal and parallel to the line of the enemy, and the projectiles of the latter caught in the revolving tubes. The angular velocity is so regulated that a projectile continuing its flight shall emerge from the tube just as the revolution is completed, thus causing it to return to the point from which it was originally fired, and showing the enemy how it feels to be "hoist by his own pc-

The velocity of the projectiles caugh varies with the distance from the enemy On the other hand the interval spent in the tube must be constant, in order that the projectile may leave the tube just as a revolution is completed. This is effected by the simple lengthening or shortening of the tube, by sliding it in or out. The velocity of a projectile varies at different points of its course; hence to insure its emerging at the proper time an eccentric motion must be given the tube This is done by having a cross-eyed nigger to turn the crank. Cavillers have objected that if both parties be provided with these weapons nobody would be hurt. Such persons ignore the fact that the tendency of all improvements in the weapons o war is to decrease the percentage of killed. The great objection to military glory has hitherto been that it was hard to get without getting hurt. This great invention does away with such drawbacks. and will, when better known, enable even "James Garfield" to gather the barn-full of genuine laurels which he missed, somehow, during the late war.

In the engagement at Veverdojo, be tween the Chilian and Peruvian forces both parties were armed with the Annihilator and Economizer. The scene of action was a plain. The combatants spent four days and nights in flank movements and countermarches, each endeavoring to gain such a position that his own line should be parallel to the enemy's, while that of the enemy should not be parallel to his own. It is evident that the party attaining this object would be able to use its Annihilators, while its enemies would not enjoy that advantage. The masterly strategy of the Chilian General in first advancing and then refusing his left wing,

first refused and then advanced his right. The Chilian finally withdrew to Solpatara, where the Government presented him with seven copper mines and a goldplated iron-clad, as a reward for his brilliant victory; and the Peruvian executed a retrograde movement to El Infierne. where he is now waiting for the usua semi-monthly revolution, when he will doubtless be made President, as a mark of

#### What was the Credit Mobilier?

the people's gratitude.

[From the New York Sun, 23rd.] Several correspondents, among them an esteemed clergy. an in a neighboring town of New Jersey, have requested us to answer this question. They understand the relations of Mr. Garfield to the Credit Mobilier: the broad relations of the Credit

less clear to their minds. A few years ago the United States endowed magnificently with its lands and bonds, and many valuable privileges, a company organized to build the Union Pacific Railway. When certain shrewd managers of this concern came to count up the cost of the work and to cast up the assets to be applied to it, they found an enormous balance on the right side of the book. In order to absorb this balance and transfer it to their own pockets, they immediately proceeded to form an inside Ring to build the road. They bought an old Pennsylvania charter called the Credit Mobilier. which was admirably adapted for the swindle in view, and under that charter name began the execution of one of the most re-

markable and successful frauds in history. As officers of the Union Pacific, the members of the Credit Mobilier contracted with themselves for the construction of the line, and fixed their own figures for the work. They thus stripped the Union Pacific of everything of value belonging to it, and set it over to the Credit Mobilier. With one hand they robbed the treasury of the railway company, and with the other they stuffed the plunder into the treasury of the construction Ring, whence t was distributed to the individual conpirators in the form of dividends of cash, onds and stocks.

But the United States, in slight return for its unexampled bounty, had taken a first mortgage on the property. This was inconvenient to the Ring. Having absorbed everything else, they now desired to put a first mortgage on the road, and take the bonds of that also. But that could be done only by getting rid of the first mortgage of the United States; that, again, could be effected only by act of Congress.

To simple-minded and honest men this would seem like a very difficult thing to accomplish; to them it appeared easy chough. 'They set apart a certain amount of the enormously valuable stock of the Credit Mobilier-stock which represented Oakes Ames, who agreed to "place it where it would do the most good." He was a member of Congress, and was, not unjustly, supposed to know exactly how to enploy it in order to corrupt the sources of legislation. With this corruption fund he bought the Vice-President several Senators, and the Chairmen of the leading committees of the House. Then, by the votes and influence of these men the desired legislation was had, and a new field of pillage was laid open to the Ring, in which the Government and the stockholders of the Union Pacific were equal suf-

It was not possible that a series of trans actions at once so colossal and so infamous could be concealed forever. There came a day when the Sun spread this iniquity before its readers in almost every detail It was the most shocking revelation of official venality and corruption ever made in the whole course of our history. Investigation followed, and the guilt of the accused members was clearly ascertained. With a few exceptions, they added the crime of perjury in their testimony before

the committee to the crime of bribery. Among others, James A. Garfield was bribed; swore that he had not been bribed was convicted of bribery and perjury by the testimony of Ames and by documentary evidence of conclusive character; and the committee, composed of members of his own party, reported him as a bribetaker and a perjurer.

GENERAL NEWS ITEMS:-Rhode Island is the first State to send to the census bureau a complete statement of population. The whole number is 276, 710, a gain of 59,309.

The Democratic Campaign in Indiana will be opened on the 14th of August, on which day public meetings will be held in every county in the State. The democratic State committee has decided to depend mostly upon its local speakers, which includes, it is claimed, at least one hundred first-class stumpers.

Private letters received at Washington from Texas say that the greenback managers have made a proposition to the Republican leaders there to support the greenback Presidential ticket, affirming that if they will do so the State can be carried by Weaver, and thus the Democrats will be deprived of the election vote of Texas, and the election of Garfield will be made more certain.

There are 64 cities in the United States with a population exceeding 30,000; there are 44 cities with more than 40,000; 34 with more than 50,000; 27 with more than 60,000; 24 with more than 75,000; 20 with more than 100,000; 4 with more than 500,000; and 1 with more than 1,000,000. A party of about 700 immigrants who were converted by Mormon missionaries in Europe arrived in New York City on Wednesday in charge of an elder, and started Thursday for Utah by the Pennsylvania railroad. The party is composed principally of Swedes, Norwegians and Danes. There were a few Englishmen and Englishwomen. #### GARFIELD AND THE COURT.

#### Judge Swayne Denies.

[Special to N. Y. Tribune, 23d.] SHARON SPRINGS, July 21 .- On Mon day, July 19, the New York World pub lished a special dispatch from Washington announcing that in 1875 Justice Swayne, of the United States Supreme Court, rendered an opinion in the case of Chittenden against McClellan and others, in which he declared that General Garfield was guilty of a sale of official influence in connection with the De Golyer contract. The World dispatch said that the case in which this opinion was rendered was tried in Cook County, Ill., in May, 1875, and was decided on appeal in October, 1879, in the United States Supreme Court, and the following paragraph is stated to be the words of Justice Swayne: Mobilier to Congress and to the people are

"The agreement with General Garfield. member of Congress, to pay him \$5,000 as a contingent fee for procuring a contract which was itself made to depend upon a future appropriation by Congress-which appropriation could only come from a committee of which he was the chairmanwas a sale of official influence, which no veil can cover, against the plainest principles of public policy. No counsellor-at-law while holding high office has a right to put himself in a position of temptation, and under pretence of making a legal argument exert his official influence upon public officers dependent upon his future action. Certainly the courts of justice will never lend themselves to enforce contracts obtained by such influence."

Justice Swayne is now here at Sharon Springs, and he has just given the following explicit and absolute denial to the

above campaign lie. He says:-"So far as I am concerned there is an entire misstatement. I never wrote a word of what is attributed to me with quotation marks. I never knew anything of the facts of the matter charged against General Garfield, and it was certainly never in any shape before the Supreme Court. I had, therefore, neither occasion nor opportunity to express any judicial opinion upon the subject. It is not stated where any case in which General Garfield was concerned is reported. My confident impression is that I never heard of such a case before. General Garfield is a personal friend of mine, and I have the highest confidence in his integrity. The statements in the World are an entire fabrication and without a particle of truth in them." In order that there might be no possible

Swayne himself wrote out the above denial.

mistake in reporting his words, Justice

[J. R. Doolittle in Chicago Times.] A serious error has been made by some newspapers in supposing that the De Golver case ever went to the Supreme Court, or that Justice Swayne used the language both the plunder of the past and the attributed to him in commenting upon it. plunder of the future—and gave it to In the brief submitted to Judge Farwell, Burke vs. Child, decided in the Supreme Court, was cited, and Justice Swayne's opinion stated. But the mistake has been this: That a part of the language of the brief which follows the citation of the case of Burke vs. Child is attributed to Justice Swayne-language which he never used for the case was never before him. As I was the counsel who submitted the brief. it is just to General Garfield, to Justice Swavne and to myself that I should at once correct this mistake.

[From the Philadelphia Record.]

The facts in connection with the De Golyer case, so far as General Garfield is concerned, have never been determined in a suit at law. During the flush times at Washington, when the Shepherd Ring was managing the affairs of the District. De Golver secured a contract to put down a quantity of patent pavement, the payment for which was made dependent on appro-priations by Congress. General Garfield was chairman of the Committee on Approprlations. The sum of \$5,000 was paid by De Golyer to General Garfield, nomi nally for his services as attorney, though he never did anything but speak to Shepherd upon the subject. Thereafter th appropriations desired were made. The profits of the job were \$400,000. The facts in regard to the payment to Garfield were disclosed in a suit brought in Chicago by George R. Chittenden against De Golyer & McClellan for a share of the profits Chittenden, in the capacity of a lobbyist at Washington, had secured the contracts and the assistance of Garfield. In defending themselves against the claim of Chittender the defendants' counsel, ex-Senator Doolittle, put in the plea that "the agreement with General Garfield, a member of Congress, to pay him \$5,000 as a contingent fee for procuring a contract which was itself made to depend upon a future appro-priation by Congress, which appropriation could only come from the committee of which he was the chairman, was a sale of influence which no veil can cover, against the plainest principles of public policy."
In support of his plea he quoted a decision of Justice Swayne in an analogous case, thus leading to the careless or malicious error which has found its way into Democratic journals. The Republican press, however, guiltily suppresses the remaining facts in the case. In the Chicago Court the plea of corruption was deemed a sufficient one. The Court refused to put its seal on the contract of the lobbyist. The case was appealed to the Suprem Court of Illinois, and the finding of the lower Court approved. It thus appears that while the stigma upon Garfield's transaction in the De Golyer case has not been deepened by a decision of Justice Swayne in the United States Supreme Court, it nevertheless remains.

"No," said Peter, "I hired you to speak in my case; now speak." Mr. Stephens told him there was noth

ing to say; he had looked on to see that it was made out, and it was. Peter was obstinate, and at last Mr. Stephens told him to make a speech him-

self, if he thought one could be made. "I will," replied Peter, "if Bobby Toombs won't be too hard on me. Senator Toombs promised, and Peter

began: "Gentlemen of the Jury: You and I splain farmers, and if we don't stick to gether these 'ere lawyers and doctors will git the advantage of us. I ain't no lawver nor doctor, and I ain't no objections to

them in their proper place, but they ain't farmers, gentlemen of the jury. Now this man Royster was a new doctor, and I went for him to come and doctor my wife's leg. And he come, an' put some salve truck onto it, and some rags, but never done it one bit of good, gentlemen af the jury. I don't believe he is no doctor, no way. There is doctors as is doctors sure enough, but this man don't earn his money; but if you send for him, as Mrs. Sarah Atkinson did, for a negro as was worth \$1,000, he just kills him and wants pay for it."

"I don't!" thundered the doctor. "Did you cure him?" asked Peter, with the slow accents of a judge with the black cap on.

The doctor was silent, and Peter proceeded: "As I was sayin', gentlemen of the jury,

we farmers, when we sell our cotton, has got to give vally for the money we ask and doctors ain't none too good to be put to the same rule. And I don't believe this Sam Royston is no doctor, nohow." The physician again put in with "Look

at my diploma, if you think I am no "His diploma!" exclaimed the new

fledged orator, with great contempt. "His diploma! Gentlemen, that is a big word for printed sheepskin, and it didn't make no doctor of the sheep as first wore it, nor does it of the man that now carries it. A good newspaper has more in it, and I'll p'int out to ye that he ain't no doctor at

The man of medicine was now in a fury. and screamed out, "Ask my patients if I

"I asked my wife," retorted Peter, "an' she said as how she thought you wasn't." "Ask my other patients," said Dr.

Royston. This seemed to be the straw that broke the camel's back, for Peter replied with a look and tone of unutterable sadness:

"This is a hard sayin' gentlemen of the jury, and one that requires me to die or have powers as I've hearn tell ceased to be exercised since the Apostles. Does he expect me to bring the angel Gabriel down to toot his horn before his time, and cry aloud, 'Awake, ye dead, and tell this court and jury your opinion of Royston's practice? Am I to go to the lonely churchvard, and rap on the silent tomb, and say to 'em as is at rest from physic and doctor bills, Get up here, you, and state if you died a natural death, or was hurried up some by doctors?' He says, 'Ask my patients,' and, gentlemen of the jury, they are all dead! Where is Mrs. Beazley's man. Sam? Go ask the worms in the grave-yard where he lies. Mr. Peak's woman Sarah was attended by him, and her funeral was app'inted, and he had the corpse ready. Where is that baby gal of Harry Stephens? She are where doctors cease from troublin' and the infants are at

"Gentlemen of the jury, he has et chicken enough at my house to pay for the salve, and I furnished the rags, and I don't suppose he charges for making of her worse, and even he don't pretend to charge for curin' of her, and I am humbly thankful he never gave her nothin' for her inwards, as he did his other patients, for somethin' made 'em all die mighty sud-

Here the applause made the speaker sit down in great confusion, and, in spite of a logical restatement of the case by Senator Toombs, the doctor lost and Peter won.

#### They Wanted to Live in the Stars.

[From the Burlington Hawkeve.] Very near us sat two young people. He wore the face of a man who shaves three times a day, and that white necktie had never seen the starlight before. There was pearl powder on the shoulder of his coat, and a tender, dreamy look in her lovely eyes. They sat and looked up at the stars, and they didn't care for any solitary thing any nearer to this earth. "Mortimer," she murmured softly-"Mortimer," his name appeared to be Mortimer, though I couldn't learn whether it was his front name or his after name-"Mortimer, dear," she said, "if we could only live apart from this busy and sordid, unsympathetic world, in one of you glittering orbs of golden radiance, living apart from all else, only for each other, forgetting the base things of earthly life, the coarse greed of the world and its animal instincts, that would be our heaven, would

it not dear?" And Mortimer, he said that it would "There, heart of my own," he said, and his voice trembled with earnestness, "my own darling Ethel, through all the softened radiance of the day, and all the shimmering tenderness of the night, our lives would pass away in an exalted atmos-phere above the base-born wants of earthly mortals, and far beyond the chattering crowd that lives but for to-day, our lives, refined beyond the common ken-"

And just then the man with the gong ame out. Mortimer, he made a grab at Ethel's hand and a plunge for the cabin door. Ethel just gathered her skirts with her other hand, jumped clear over the

before she had time to stop it; down the stairs they rushed, collared a couple of chairs at the nearest table, feed a waiter, and opened the action without skirmishing. I am a man of coarse mould and an earth. born appetite myself, and I wouldn't live in a star so long as I could find a good hotel in America; but long, long before I could get seats at the table for my family, Mortimer and Ethel had eaten two bluefish, a little rare beefsteak, some corn bread, a plate of hot cakes, two boiled eggs, and a bunch of onions, and a waiter had gone out to toast them some cheese.

MORAL. I have, during my wanderings, met several people who wanted to live in a star, where earth-born people with animal appetites couldn't trouble them, and I always tound the safest place for an earth-born man, when the star-born soul started for the dinner-table, was behind a large rock. Distrust the aspiring mortal who lives in a plane so elevated that he requires the use of a telescope when he wants to look down at the rest of us. And if he ever wants board at your humble table, charge him \$15 a week, and feed him lots of soup, or you'll lose money on him.

## AFTER THE MAIN CHANCE.

What the new Secretary tells the Yankees about North Carolina.

[Special to N. Y. Times, 23d.] RALEIGH, N. C., July 22.—The Republican State Committee met in this city to-day, every member being present.

The opinian of the committeemen coming from each Congressional district that the State can be carried by a substantial majority is fully warranted by details and comparisons thus made from every quarter of the State. The Hon. Ralph P. Buxton, the nominee for Governor, was present at the meeting of the committee. He will at once resign his position as Superior Court Judge and enter upon a vigorous and thorough canvass. The committee will proceed at once to organize thoroughly in every township and county throughout the State. Information from the leaders brings the assurance that the party is fully alive to the importance of the situation, and will heartily second and aid the committee in every effort to organize and bring out the vote. It is only necessary to enlist the active services of every Republican, that the National Committee should let it be understood at once that North Carolina is not to be surrendered to the Democrats, and that substantial aid, to the fullest capacity of the committee, will be extended to the Republicans of this State, and that a desperate contest will be made to carry the State and break the solid South.

Col. W. P. Cannady was unanimously nominated at Smithville, Tuesday, by the Republicans of the Third District as their candidate for Congress. Every county was represented in the Convention, and the delegates were decided in their opinion that large gains will be made in every county in the district. The majority in this district in 1876 was 1,600. It is confidently believed that this can be overcome and Mr. Cannady elected. The nominee only desires that his district shall be treated as other districts in the States which the Republicans expect to carry. No district will be more thoroughly canvassed and details more fully attended to than the Third. The nominations thus far made by the Republicans, and the preparations for the contest, point to a full Republican vote, with every indication of success The signs of victory are much more decided than at any time since 1868, and the Republicans begin to feel that they are not to be counted out. The Northern Republicans may now understand that all that men can do to break down the solid South will be done by North Carolina Re-

#### Not the Man for Texas.

[From the Galveston News.] He was just from New York, where he had been on the police, but he had left that city for some reason and went to Galveston. The first thing he did was to apply for a position on the Galveston police. He was a determined-looking man with a bad eye, a nose like a hawk's beak, and he was built all the way up from the ground like a bank safe.

"Do you think you can make arrests and guard prisoners?" asked the Galveston Chief of Police.

The applicant smiled a smile that made everybody in the office feel positively uncomfortable. It was the kind of a smile that John McCullough, as Othello, smiles when, towards the last, he begins to see through "honest Iago."

"Suppose you had six prisoners, and one of them was to run off; would you leave the five and follow up the fugitive?" asked the Chief of Police.

"Why, no," responded the hard-faced applicant, "I'd shoot the five who didn't try to escape, so I would know where to look for them when I got back with the

body of the other one.' "That's all right in New York, but it is too rough for Texas," replied the Chief

#### of Police. Why She Decorated the Bear.

[From the San Francisco Post.] While the procession celebrating Memorial Day at Marysville was wending its melancholy way towards the graves of some more or less supposititious Union soldiers in the vicinity, they passed a wayside inn, not far from town, kept by a buxom widow. Among the attractions for entertainment of passers-by provided by the aforesaid hostess was a huge grizzly bear, chained to a tree in the yard, which intelligent animal was a shining proficient in the usual branches of ursine education, such as drinking bottles of pop and the like, besides being sometimes rented by the widow to give eclat to an occasional

Sunday bull-fight. On this occasion, however, instead of being industriously engaged in diluting her stock of fire-water to the standard Marysville proof, the widow was discovered weeping bitterly, and at the same time ornamenting grizzly's neck with garlands of flowers, which she arranged upon the savage brute by means of a long pole. At this astonishing sight the parade

"Guess she's gone crazy," said the grand marshal. "Hello! Mrs. Jones, what are you doing that for ?"

"Ain't this Decoration Day?" snapped the widow through her tears. "Why, cert," replied the orator of the day, who had been playing "old sledge" with the chaplain all the way out.

"Well, then, what are you staring at? This bear ate my poor dear husband sixteen years ago, and every year I decorate

And the band struck up the dead march as the procession moved on.

When the Corry Press suspended publication it gave the citizens of the place such an overhauling that there was some talk of giving Mr. Fenno, the proprietor, a dose of tar and feathers. The Union City Times asked Mr. Fenno concerning this and he made answer as follows: "It may be that the people will break into somebody's hen-roost and steal the feathers, but they are too blamed stingy to buy

on the farms near Norfolk, and considerable damage is reported.

Who is Your Wife? A COMPLEX CONUNDRUM COLLOQUIALLY

BY WALDORF H. PHILLIPS.

We beg leave to announce that we have published, under the above title, a very novel and remarkable work. It is, in the form of fiction, a humorcus and powerful satire on Divorce Laws and their complications. The author takes for his text a proposed new marriage ceremony, thus:—
"Do you take this woman to be your wife—until you are divorced?
"Do you take this man to be your husband—until you change your mind?

band—until you change your mind?
"Then, they whom I unite, let some
Court put asunder."
The work is full of humor and keen sanovel addition to American publications, and it is confidently believed will prove the literary sensation of the year. Price, in paper binding, 50c.; in cloth, 75c. Can be had of all Booksellers and News Dealers or will be sent postage wild upon reers, or will be sent, postage paid, upon receipt of the price, by the publishers.

# GILDERSLEEVE'S LATIN SERIES

- B Y -B. L. Gildersleeve, Ph. D., Gottingen. LL.D., Professor of Greek in Johns Hopkins University, Baltimore.

Rarely have text-books been greeted with se large a measure of favor and hearty apprecia-tion, as these books by Professor Gildersleeve have received from the best scholastic and eduhave received from the best scholastic and edu-cational minds of the country. The author, now of national reputation as a scholar, has had very complete preparation for such a work. After being graduated at Princeton, he studied for several years in the Universities of Ger-many, where he received his Ph.D., etc., with highest honors. His subsequent life has been devoted to teaching and linguistic study. When the new and richly endowed Johns Hopkins University sought for a fit man for its chair of Greek, the appointment was conferred on Prof. Gildersleeve, after wide conference, and without his solicitation or effort, and his work as senior professor of the University attracts marked atprofessor of the University attracts marked attention. He is also the presiding officer of the American Philogical Association.

Prof. Gildersleeve's Latin books are the product of this order of ability and educational

training. Embodying the best results of recent studies in Latin philology, they are simple, clear and practical in method. THE LATIN PRIMER, complete in itself, a naturally developed course for beginners, at once holds the interest of the pupil, and prepares him thoroughly for ready and intelligent use of Grammar and Reader, or Latin author. It supplies: "Maximum of Forms; Minimum of Syntax; Early Contact

Forms; Minimum of Syntax; Early Contact with the Language in Mass."

A teacher in one of the leading High Schools of the country, who conducted a large class through this book, writes:

"We have just finished the Primer, having spent upon it thirty-four weeks; and I have been trying to realize my pupils' attitude towards the study, as compared with that of other classes I have known. They have the use of a larger vocabulary; their text-book has secured for them a careful drill in the normal terminations; they have been brought more into contact with the language in the concrete, and have, tact with the language in the concrete, and have, therefore, a more vivid interest in it; and they have been less perplexed by exceptional forms and difficult construction.

"The book is thoroughly alive, and will perforce make its students so THE LATIN GRAMMAR is marked by its genuine scholarship, clear and logical arrangement of material, and a typogra-phy that pleasantly aids the eye. Its presenta-tion of forms is plain and convenient; its defi-nitions, rules and other statements are brief and

pointed; and its translations of illustrative examples are most striking models for students. THE LATIN READER has Fables and Stories; "De Gestis Alexandri," a most interesting narrative, chiefly from Cur-tius; one book of Casar's "De Bello Gallico," treated in a manner to make it an admirable drill in Latin Syntax; also notes and Refer-ences to the Grammar, and a Vocabulary.

THE LATIN EXERCISE-BOOK, a book of Latin Composition, compact in form, is noticeable for its well-graded course of exercises, apt choice of idioms, and adaptation to train the average learner to a thorough mastery of the words and constructions of the language. Single specimen copies for examination fur-ished on receipt of the following prices:
